Potentiometers, sensors and thick-film custom applications

To ACP distributors, partners and customers

Tarazona, October 2nd, 2018

ACP in compliance with REACH.

Aragonesa de Componentes Pasivos S.A. is aware about its responsibility and obligations resulting from Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). After each ECHA's decision to include substances in the candidate list of Substances of Very High Concern (SVHC), <https://echa.europa.eu/candidate-list-table>, the last **June 27th 2018 (REACH 191)**, we have asked our suppliers whether the raw materials they supply to us contain any SVHC.

Based on our suppliers' replies, we can confirm that, to our best knowledge and belief in the date this letter is signed, the products (articles) ACP manufactures and commercializes do not contain any of the substances introduced in the SVHC candidate list on the dates below in a concentration above 0,1% weight by weight (w/w). ACP will continue its program to assure the latest SVHCs are not intentionally added to our products*.

Further certificates can be found on our website: <https://www.acptechnologies.com/company/reach-rohs/>

In case of any further questions concerning the REACH regulation in connection with our products, please contact your Customer Service representative or send us an e-mail to sales@acptechnologies.com

Sincerely,

José Ramón Sevillano
Environmental Manager

**While we believe that none of those substances will be found in our products, we have to stress that this information is true "to our best knowledge and belief in the date this letter is signed".*

We are committed to comply with every respect to the requirements of REACH and relevant amendments. At present, we do not expect any SVHC to be in our products. Should any supplier inform about any change in the composition of the raw materials they supply to us that were to have any relation to their content of SVHC, we will immediately inform our customers.

We are following the evolution of the Reach regulation very closely; as soon as more definite information is available and consequently, suppliers send us more information, we will forward it to our customers.
